Contents of Volume 53

Part 1 May 2000

1 Three-mode principal components analysis: Choosing the numbers of components and sensitivity to local optima
Marieke E. Timmerman and Henk A. L. Kiere

17 Distribution of the standardized mean change effect size for meta-analysis on repeated measures
Scott B. Morris

31 Robust transformation with applications to structural equation modelling
Ke-Hai Yuan, Wai Chan and Peter M. Bentler

51 An examination of the robustness of the empirical Bayes and other approaches for testing main and interaction effects in repeated measures designs
H. J. Keselman, Rhonda K. Kowalchuk and Robert J. Boik

69 Repeated measures ANOVA: Some new results on comparing trimmed means and means
and R. Wilcox, H. J. Keselman, Jan Muska and Robert Cribbie

83 Modelling sequentially scored item responses
Wies Akkermans

99 Triadic distance models for the analysis of asymmetric three-way proximity data
Mark de Rooij and Willem J. Heiser

121 Modelling asymmetric similarity with prominence
Mikael Johannesson

140 Book reviews

141 **Statistical software for microcomputers: AMOS 4.0**

Part 2 November 2000

145 Rank-based tests for interactions in a two-way design where there are ties
Rand R. Wilcox

155 Standard errors of the principal component loadings for unstandardized and standardized variables
Haruhiko Ogasawara

175 Testing treatment effects in repeated measures designs: Trimmed means and bootstrapping
H. J. Keselman, Rhonda K. Kowalchuk, James Algina, Lisa M. Lix and Rand R. Wilcox

193 Exact finite-sample significance and confidence regions for goodness-of-fit statistics in one-way multinomials
Migual. A. García-Pérez

209 Statistical analysis of nonlinear structural equation models with continuous and polytomous data
Sik-Yum Lee and Hong-Tu Zhu

233 Optimal scaling of a longitudinal choice variable with time-varying representation of individuals
Kohei Adachi

255 A local influence approach to identifying multiple multivariate outliers
Wai-Yin Poon, Shing-Fong Lew and Yat Sun Poon

275 Testing Thurstonian case V ranking models using posterior predictive checks
Rung-Ching Tsai and Grace Yao

293 Time-dependent Poisson counter models of response latency in simple judgment
Philip L. Smith and Trisha Van Zandt

317 Confidence intervals for hidden Markov model parameters
Ingmar Visser, Maartje E. J. Raijmakers and Peter C. M. Molenaar

328 Book reviews

335 **Statistical software for microcomputers: SigmaPlot 2000 and Sigma Stat2**
